

The image is a composite of scientific and biological elements. At the top, several petri dishes are visible, some containing cultures. Below them, a glowing 3D model of a cell or tissue structure is shown, with bright yellow and orange highlights. To the right, a complex chemical structure is depicted, featuring various atoms and bonds, including a CH₂ group. The background is dark with a field of small, bright, glowing particles, suggesting a microscopic or molecular environment.
