About Conference

39th Euro Global Summit and Expo on Vaccines & Vaccination will be organized around the theme “The race is on: COVID-19 Vaccines and Current R&D status”.

Euro Vaccines 2021 is comprised of keynote and speakers sessions on latest cutting edge research designed to offer comprehensive global discussions that address current issues in Euro Vaccines 2021. A new strain of coronavirus not previously identified in humans, the Severe Acute Respiratory Syndrome Corona virus (SARSA-CoV-2), emerged in December 2019. Currently, 19 network members engaged in research and development of COVID-19 vaccines, using six principal technology platforms. Almost a third of network members having vaccines prequalified by the World Health Organization comply with international regulations and mechanism to distribute vaccines across borders. The use of existing manufacturing, fill-finish and distribution capabilities can support an efficient roll-out of vaccines against COVID-19, while manufacturing fill-finish and distributions capabilities can support efficient roll-out of vaccines against COVID-19, while maintaining supply security of existing vaccines for on-going immunization programmes. However, the global harm wrought by COVID-19 in terms of effect on lives and livelihoods massively overshadows that of Zika. The risks, then, of a SARS-Co-V-2 challenges study would be more easily outweighed by the social value of a challenge study that can substantially improve understandings of COVID-19 by the social value of a challenge study that can substantially improve understanding of COVID-19 and accelerate vaccine development.

The dashboard of Google Analytics traffic overview of “39th Euro Global Summit and Expo on Vaccines & Vaccination” clearly reflects the interests of the global enthusiastic conference attendees like Neurologists and Neuroscientists, Neurosurgeons, Researchers, medical practitioners-neurologists, Health care

professionals, Industrial Experts and Psychiatrist from around the globe who are searching to attend and present/exhibit their research/organization findings on highly acknowledged international conferences like ours with the web traffic a total of about 195250 visits. The total page views were close to 516205 where our reports are analyzed half yearly.

- More than 70000 Visitors visiting conference website to attend and submit proposals Highest number of Visitors reporting both from the developed and developing nations.
- For Under developing nations researchers our conference website is yardstick to quantify their research proposal submitted
- Highest number of Visitors reporting both from the developed and developing nations.
- Penetrating the study of visitor, navigation, and traffic patterns to determine the success of our conference website majority amount of traffic we receive from cities like Austin, Boston, Chicago, Dallas, Denver, Houston, Los Angeles, Nashville, New York, Philadelphia, Phoenix, San Antonio, San Diego, Seattle, Washington, Toronto, Montreal, Vancouver, Berlin, Barcelona, Paris, Edinburgh, London, Rome, Valencia, Zurich, Copenhagen, Athens, Moscow, Vienna, Sydney, Melbourne, Beijing, Hyderabad, Tokyo, Singapore, Seoul, Auckland, Cairo, Dubai, Riyadh and Istanbul.
- Average Time spent by each visitor on Site is over 2.08 Minute.
