

A warm welcome to participate as an editor for journal of advanced surgical research.

Hazel Smith*

Editorial Office, Journal of Advance Surgical Research, London, United Kingdom

Accepted February 25, 2021

Announcement

First and foremost, we would want to express our heartfelt appreciation to the editors of this Open Access Journal. Journal of Advance Surgical Research collaborates with over 20 prominent Editors and publishes high-quality articles in the field of Advance Surgical Research.

We use an Editorial Tracking System, which is an online manuscript submission, review, and tracking system, to ensure quality in the peer review process. Review processing is carried out by members of the Journal's editorial board or by outside specialists; acceptance of any citable submission requires the permission of at least two independent reviewers, followed by editor approval. Authors can submit manuscripts and follow their progress via the system, which will hopefully lead to publication.

As you are all aware, Editorial Board Members are very important in encouraging the Editors' desire to keep up exclusive expectations of insightful greatness in the work we distribute. We are extremely grateful for the priceless work of our board individuals in contributing both to our thorough companion audit framework and to the crucial advancement of the Journal.

The Journal group includes global experts in relevant logical distributions. To ensure distribution quality, all submitted papers go through many processes. The compositions are subjected to the standard companion audit measure. There is preliminary screening using an infinite supply of paper. Fitting papers are then sent out, and in any case, two free refs are included. The remarks from the arbitrators are considered by the Editor-in-Chief, the key individual settling on an ultimate conclusion. Giving timely and high-quality feedback to our respected artists remains a priority so that their work may be made available to the global population on time.

The COVID-19 epidemic has created widespread disruption, posing problems for everyone. Several researchers/technicians

are still dealing with problems such as laboratory closures and the arranging of online education while also dealing with the impact of this pandemic crisis on their day-to-day life. Some of the editors, reviewers, and authors of numerous publications are also doctors fighting the epidemic. As a result, delays during this epidemic time are unavoidable, and we would like to express our gratitude. It is essential that our Editors and Editorial Advisory Board purchased to address the issues we disseminate as well as represent the countries from where our entries originate. Furthermore Advance Surgical Research has supported researchers in their early-career.

Researchers/Scientists/Authors are welcome to submit their CV and research interests with us in order to become an Editorial Board Member, where they may work closely with the Editors and Reviewers to give the same high quality and rapid review process.

If you are interested in joining our Editorial Board, Please send us your updated CV, Research Interest, Biography, Recent Photograph (JPG) to E-mail id: medsurgery@escientificjournals.com

The editors are looking forward to working with our new hires over the coming few years. I extend a hearty welcome to all of our board members, as well as those who have decided to join our recognised list of researchers.
