

Announcement 2021

Growing prevalence of respiratory diseases due to the increasing population and pathogens in the environment has been the key aspect for motivating the respiratory disease market globally. Pharmaceutical companies have been developing new bio-based drugs in amalgamation with bio-technology which promises massive growth opportunities along with sustainable development for respiratory disease market over the next decade. Every year the usage of Respiratory devices is on high rise and the market is growing exponentially to meet the demand.

With the aim of accelerating the importance of Respiratory Disease, Meetings International is organizing 2nd International Conference on Respiratory Disease & Care during April 19-20, 2021 in Berlin, Germany with the theme "Optimizing Research Strategies for Lung Disorder Treatments". Scientific session includes Pathogenesis of COPD, Drugs & Diagnostic Evolution of COPD, Pulmonary Infections & Treatment, Asthma Immunology & Medication, Immunotherapy & Transplantation, Lungs Disease & Their Cause, Environmental & Occupational Lung Disease, Chronic Respiratory Diseases, Respiratory Pharmacology & Care, Acute Respiratory Distress Syndrome, Targeted Therapy for Lungs Cancer, Cystic Fibrosis. Respiratory Care Meetings embraces with Keynote Session, Oral Session, Poster Session, Young Researchers Session and Exhibitor Session.

Berlin is hosting Respiratory Care 2021. Berlin, capital and chief urban centre of Germany. The city lies at the heart of the North

German Plain, athwart an east-west commercial and geographic axis that helped make it the capital of the kingdom of Prussia and then, from 1871, of a unified Germany. Berlin's former glory ended in 1945, but the city survived the destruction of World War II. It was rebuilt and came to show amazing economic and cultural growth. Germany's division after the war put Berlin entirely within the territory of the German Democratic Republic (GDR, or East Germany). The city itself echoed the national partition—East Berlin being the capital of East Germany and West Berlin a Land (state) of the Federal Republic of Germany (FRG, or West Germany). West Berlin's isolation was later reinforced by the concrete barrier erected in 1961 and known as the Berlin Wall. Its status as an enclave made Berlin a continuous focus of confrontation between the Eastern and Western powers as well as a symbol of Western lifestyle for 45 years. The fall of the East German communist regime—and the accompanying opening of the wall—in late 1989 unexpectedly raised the prospect for Berlin's reinstatement as the all-German capital.

Respiratory Care 2020 has been concluded with the discussion on respiratory Diseases, Lungs Cancer, Pulmonary Disorder, Pulmonary Distress Syndroms, Lungs Disorder, Respiratory Track Infection and many more with the companionship of our Organizing Committee Members, Keynote Speakers, Oral and Poster Presenters. With the unique feedbacks from Respiratory Care 2020 we would like to announce the commencement of 2nd International Conference on Respiratory Disease & Care during April 19-20, 2021 in Berlin, Germany with the theme "Optimizing research strategies for lung disorder treatments".
