

## 10<sup>th</sup> Conference on environmental science and pollution control.

Harriet Wood\*

Managing Editor, Journal of Environmental Waste Management and Recycling, United Kingdom

Accepted July 26, 2021

### About Conference

Hear, explore and learn the latest research. Present before the distinguished global audience. Collaborate, build partnerships and experience Tokyo, Japan. Join the global academic community.

Conference Series LLC LTD invites all the participants across the globe to attend the “**10th Environmental Science and Pollution Control**” during **September 24-25, 2021** at **Tokyo, Japan. Pollution Control 2021** includes prompt keynote presentations, Oral talks, Poster presentations and Exhibitions.

Pollution Control 2021 aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Environmental Science and Pollution Control. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Environmental Science and Pollution Control. This scientific gathering guarantees that offering the thoughts and ideas will enable and secure you the theme- “*Environmental Sustainable for Global Pollution*”.

### Importance and Scope

Contamination counteractive action secures the earth by preserving and ensuring regular assets while fortifying financial development through increasingly proficient creation in industry and fewer requirements for family units, organizations and networks to deal with waste.

The extent of ecological investigations is wide and it manages numerous zones like:

- Conservation of common assets
- Biological viewpoints
- Contamination of the encompassing regular assets
- Controlling the contamination
- Social issues associated with it
- Effects of human populace on nature

### Why to Attend?

With members from around the world focused on learning about Environmental pollution and Science technologies, this is your single best opportunity to reach the largest assemblage of participants from the Environmental Science and Pollution Control. Conduct demonstrations, distribute information, acquire knowledge about current and trending Environmental Science and Pollution Control technologies, make a splash with a new research, and receive name recognition at this 2 days event. World-renowned speakers, the most recent techniques, tactics, and the newest updates in Environmental Science and Pollution Control fields by using natural products are hallmarks of this conference.

### Conference Highlights:

- Environmental pollution
- Pollution sources and effects
- Global warming
- Ocean and climate change
- Pollution analysis
- Pollution ecology and toxicology
- Environmental protection
- Human impact on the environment
- Environmental sustainability and development
- Pollution solutions
- Recycling and waste management
- Bioenergy and biofuels
- Risk assessment
- Trending market in pollution control

**“Attending and presenting at conferences remains as the most favorable model of knowledge dissemination for researchers and practitioners to keep abreast of all advances in their field, presenting state-of-the-art research usually on a variety of subjects.”**
