Dear Readers,

We are very much delighted to mention all of you that we have completed our 15th successful year in the arena of publishing and research on RNA and Genomics. Over the past 15 years we have spread our wings across the globe and have collaborated with many scholars, researchers and budding scientific community who has contributed to our growth and success. Our combined continuous efforts has received a tremendous response and attracted billions of readers across the globe.

During the year 2019, all issues of volume 15 were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online. Journal of RNA and Genomics has published articles related to RNA and gene function, including but limited to, the of structure and function of RNA, including mRNA, tRNA, rRNA and ribozymes, RNA editing, RNA chemistry, non-coding RNAs, siRNAs, miRNAs, transcriptomics, genome editing, genome analysis, functional genomics, epigenomics and RNA seq/whole genome sequencing, microarray analysis and computational genomics. Out of all the papers published Most of the papers were from United States of America, India and African subcontinents. Average publication lag time of an article was further reduced to 45 days.

Journal of RNA and Genomics (formerly Journal of RNAi and Gene Silencing) will publish high-quality original research and review articles in the general areas of RNA structure and function and genomics. The journal specifically prioritizes the publication of streamlined scientific manuscripts that have biomedical and agricultural implications.

The journal accepts manuscripts in the form of research articles, review articles, short communications, commentaries, opinion articles and Letters to Editor. All submissions should be made online via the editorial manager system. The acceptance or rejection of the submitted manuscripts is based on the comments provided by the subject matter experts. As of

today's society, the use of social media has become a necessary daily activity, it is a valuable tool locally and worldwide, so we will communicate with the Researchers, Students, Scholars, Scientists, Professors, Deans, Institutes, Universities, and all the members related to the subject through LinkedIn, Twitter, Face book, My Live Chart, WhatsApp. We post the upcoming Issue and Journal highlights and current research works in social networks, So that all the members can work on the research and submit their papers.

I take this opportunity to acknowledge the contribution of authors during the final editing of articles published and the support rendered by the editorial assistant in bringing out issues of RNA and Genomics in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of Journal of RNA and Genomics, the office bearers and staff for their support in bringing out yet another volume of APN and look forward to their unrelenting support to bring out the Volume 16 of RNA and Genomics in scheduled time.
