Editorial Note

Visit for more related articles at [Journal of Neurology and Neurorehabilitation Research](#)

I am pleased to introduce (Neurology and [Neurorehabilitation](#) Research) a rapid peer reviewed Journal. I am pleased to announce that, all issues of volume 2 were published online well within the time and the print issues were also brought out and dispatched within 3 publishing the issue online during the year of 2019.

The Journals aims to flourish and to maintain the standards in research and practice, provide platform and opportunity to present evidence based on neurology and analytical assessment of research and probably it is much in deed for students, teachers and health care professionals to enhance the patient care. The current standard of care in the neurology and [neurorehabilitation](#) scenarios such as motor assessments of tremors, balance, postural sway and control remain subjective and depend on the observer's experience, clinical judgment and occasionally trial and error. While, technology is fast paced and has the potential to augment the clinical measures, it needs to be scientifically validated prior to implementation.

During the calendar year of 2019, received a total of 28 manuscript, out of which 16 articles (60%) were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. During 2019 around 12 articles were subjected for publication after they are accepted in the peer review process. In the 1 issues of Volume 2 published during the year 2019, a total of 4 articles were published of which, articles were published from authors all around the world. Globally articles have been accessed by the research scientists and also cited.

During the calendar year 2019, a total of four Editors, six Reviewers joined the board of JNNR and contributed their valuable services towards contribution as well as publication of articles, and their valuable reviewer comments will beneficial to publish quality of article.

I take this opportunity to acknowledge the contribution of during the final editing of articles published and the support rendered by the editorial assistant. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JNNR, the office bearers for their support in bringing out yet another volume of JNNR and look forward to their unrelenting support to bring out the Volume 6 of JNNR in scheduled time.
