### Abstract

**The Cognitive Neuroscience Journal is an open access journal that places a momentous role in publishing novel and high-quality research papers and other material on all topics relating to neuroscience and psychology, overlapping with disciplines such as physiological psychology, cognitive psychology, and neuropsychology.**

*Accepted on 2021*

The Cognitive Neuroscience Journal is an open access journal that places a momentous role in publishing novel and high-quality research papers and other material on all topics relating to neuroscience and psychology, overlapping with disciplines such as physiological psychology, cognitive psychology, and neuropsychology. I am pleased to mention that during the year 2019, all issues of Volume 2 were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online.

The JCR Impact factor of journal for the year 2019 was increased to 0.86. The Cognitive Neuroscience Journal has emerged one of the best open access journals that aim to publish the most complete and reliable source of information as original articles, review articles, case reports, short communications, clinical studies, etc. in the field and provide online access without any restrictions or subscriptions to the researchers worldwide.

Cognitive neuroscience is the scientific field that is concerned with the study of the biological processes and aspects that underlie cognition, with a specific focus on the neural connections in the brain which are involved in mental processes. It addresses the questions of how cognitive activities are affected or controlled by neural circuits in the brain. During the calendar year 2019, the

journal received a total of 25 papers, out of which 10 articles (40%) were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. Average publication lag time of an article was further reduced to 2-3 weeks.

During the calendar year 2019, a total of 5 Editors, 10 Reviewers joined the board of The Cognitive Neuroscience Journal and contributed their invaluable services towards contribution as well as publication of articles.

I take this opportunity to acknowledge the contribution of Dr. Kaan Yagmurlu, Editor-in-Chief during the final editing of articles published and the support rendered by the editorial assistant, Emily Jane in bringing out issues of journal in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of journal, the office bearers for their support in bringing out yet another volume and look forward to their unrelenting support to bring out the Volume 3 in scheduled time.
