

International Conference on Molecular Microbiology, December 07, 2020 Webinar

Editorial Note

We had a huge success with the merge of International Conference on Molecular Microbiology, Webinar scheduled on December 07, 2020.

The significance of the meeting was achieved due to the accumulation of all the related group of spectators of research scientists to share their knowledge, research work, technologies, and furthermore trade of worldwide Information towards the correct crowd at ideal time. Congress has received a generous response from all over the world.

This has been organized with the aim to the corporate community and to create a platform for the exchange of information on technological developments, new scientific modernization and the effectiveness of various regulatory programs towards Microbiology Conf 2020 and World Vaccine Meet 2020. The conference was organized around the theme “Innovative Microbial Technology for a better tomorrow”. The congress is about the present and future challenges in the field of Microbiology.

We would like to thank

- Ayman M. Noreddin, Pharmaceutical Sciences, Galala University, Attaka, Egypt
- Asad U Khan, Interdisciplinary Biotechnology Unit, Aligarh Muslim University, Aligarh, India
- Jorge Trujillo Mendoza, Microbiology graduate, University of Aberdeen, Aberdeen, UK
- Kym Lowry, University of Queensland, Queensland, Australia
- Wafaa Ahmed Zahran, Medical Microbiology & Immunology, Menoufia University, Egypt

We would like to thank each and every participant of Microbiology Conf 2020 Webinar to make this a huge success. And special thanks to media partners for the promotion of our event.

We are happy to announce the 2nd International Conference on Molecular Microbiology during December 06-07, 2021 which aim to bring together the prominent microbiologists, researchers academic scientists, and research scholars to exchange and share their experiences on all aspects of Molecular Microbiology.

Major topics discussed to be covered in the webinar are Coronavirus (COVID-19), Advanced Research in Microbiology and Public Health, Discovery and Pharmacology of Antibiotics, Applications of Microbes, Bioremediation and Biodegradation, Drug Discovery Technologies in Antibiotics, Clinical Microbiology and Biotechnology, Environmental Microbiology, Genetic Engineering in Microbiology, Industrial Microbiology, Infectious Diseases, Microbial Biofilms, Infection & Immunity many more.
