

Energy alterations and chakras energies deficiencies as the main cause of recurrent urinary tract infection resistant to antibiotics treatments

Huang Wei Ling

Medical Acupuncture and Pain Management Clinic, Brazil

Abstract:

Introduction: The gold standard for the diagnosis of a urinary tract infection is the detection of the pathogen in the presence of clinical symptoms. An uncomplicated UTI is one that occurs in a healthy host in the absence of structural or functional abnormalities of the urinary tract. Recurrent uncomplicated UTI may be defined as 3 or more uncomplicated UTIs in 12 months. In traditional Chinese medicine, the physiopathology of the disease is Kidney Yin deficiency, Blood deficiency and Heat retention. Purpose: To demonstrate that patients with recurrent urinary tract infection resistant to antibiotics treatment have energies imbalances and chakras energies deficiencies that is maintaining the infectious process in the energy point of view and the corrections of these energies imbalances are very important to treat the root problem and not just the symptoms. Methods: Through two cases reports of patients (woman’s) with a history of 20 years of recurrent urinary tract infection, that was not responding to the treatment using antibiotics. They searched for another kind of treatment and the medical doctor diagnose them with Kidney Yin and Yang deficiency, Blood deficiency and Heat retention. They were submitted to radiesthesia procedure and discovered that all their chakras were in the minimum level (1 out of 8). The treatment consisted in Chinese dietary counseling, auricular acupuncture with apex and Bladder ear bloodletting and replenishment of the chakras energy using homeopathy (according to the theory Constitutional homeopathy of the five elements based on traditional Chinese medicine, crystal based medications). Results: The treatment done, both patients improved their condition of recurrent urinary tract infections and never appear again, but both patients are still in treatment until nowadays. Conclusion: the conclusion of this study is that patients with recurrent urinary tract infection resistant to antibiotics treatment have energies alterations and chakras energies deficiencies and the rebalance of the internal energy (Chinese dietary counseling, auricular acupuncture with apex and urethra ear bloodletting)

and replenishment of that chakras energy deficiencies with highly diluted medications according to the theory Constitutional Homeopathy of Five Elements Based on Traditional Chinese Medicine and crystal based medications were important tools to cure the recurrence of this kind of infection.

Biography: Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, a General Practitioner and Parenteral and Enteral Medical Nutrition Therapist. Once in charge of the Hospital Infection Control Service of the City of Franca’s General Hospital, she was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all chronic diseases in a holistic way, with treatment guided through the teachings of Traditional Chinese Medicine and Hippocrates. Researcher in the University of São Paulo, in the Ophthalmology department from 2012 to 2013.
