

## Global Virtual Summit on Environmental Health.

Daniel Archer\*

Managing Editor, Environmental risk assessment and remediation, United Kingdom

Accepted on July 08, 2021

Global Virtual Summit on  
**Environmental Health**  
October 06-07, 2021 **Webinar**  
Environmental Education in a Time of Eco Systemic Crisis

### About Conference

As a representative of Global Virtual Summit on Environmental Health, we are pleased to welcome you to connect with the Webinar scheduled on October 06-07, 2021 which is an outstanding assembly for the worldwide prominent professionals in the field of Environmental Science where Administrators, Scientists, Professors, Researchers, Students and Delegates are about to share their academic research work and accepting newly emerging developments in the conference areas.

Environmental Health 2021 is an International platform to study about the timely detection as well as dealing based on Professional standards, and intense research to complete precautions for whole Environmental Health issues. The conference contains significant international experts in Environmental Health specialists, researchers and general practitioners, Students, Delegates and professors from all over the world to our webinar with the theme "Environmental Education in a Time of Eco Systemic Crisis". Webinar will be featuring oral presentations, picture presentations, keynote discussions, workspaces and many more.

The conference will focus on Environmental sciences, Environmental Diseases, Climate change and infectious diseases, Global warming, Environmental Epidemiology, Rehabilitation of Environment, Climate change and nutrition, Pollution research, Environmental hazards, Ecology

conservation, Ecological development, Air quality and atmospheric pollution, Biological effects of chemicals, Environmental health and toxicology, Ecological risk and assessment management.

### Scope and Importance

Environmental Health 2021 aims to discover advances in Environmental Health and study about the initial exposure of Environmental Health issues, and intense research to complete cure for entire Environmental Health. The Conference is to give a platform to academicians and practitioners from various disciplines to discuss and deliberate on social change that is covered by innovation and knowledge.

### Who can attend?

Environmental Health 2021 brings together individuals who have an interest and awareness in different fields of Environmental Sciences like Global warming, Environmental pollution, Environmental toxicology, Pollution research, Environmental hazards, Environmental economics, Biodiversity, Health care management, Environmental health and toxicology, Ecology conservation, Doctors & Specialists in Environmental health, biologists, ecologists, biochemists, Researchers, students and delegates. It is a medium to discover issues of mutual concern as well as exchange knowledge, share suggestions, thoughts, and make solutions.
