

## Conference Announcement Plant Pathology 2021

We are pleased to welcome you to the “Plant Pathology 2021” after the successful completion of the series of pathology Congress. The congress is scheduled to take place in the beautiful city of New York, USA, on November 08-09, 2021. This Plant Pathology 2021 conference will provide you with an exemplary research experience and huge ideas.

Plant Pathology is a branch of Plant science concerned with the biological control by microorganisms, Plant diseases, identification & control and crop research.

Plant Pathology focuses on “Future Renovation on Plant care and Disease management”.

Plant Pathology 2020 is focusing on “Exploring Innovative Research in Plant Pathology” to develop and explore knowledge among the Plant Pathology community and to launch new businesses and swapping ideas. Providing the right stage to present thought-provoking Keynote talks, plenary sessions, Discussion Panels, B2B Meetings, Poster symposia, Video Presentations, and Workshops. Plant Pathology 2020 foresees over 200 participants from 7 continents with revolutionary subjects, discussions, and expositions.

This will be a marvelous viability for the researchers, students and the delegates from Universities and Institutes to intermingle with the world-class Scientists, speakers, technicians and Microbiology Practitioners and Industry Professionals working in the field of Plant Pathology system. To enhance the field and make people aware of it.

We would like you to share, extend and impart your valuable thoughts to the global scientific event set to happen in Texas this year as we start to prepare the dais for a grand discussion.

The organizing committee decided to hold a conference. Plant Pathology is one of the fast growing and developing areas of surgery. People who have missed attending the past conference are most welcome to present your research ideas at the 2020 Plant Pathology. This conference will help you improve networking with eminent people in the field of Plant Pathology.

International Conference on Plant Pathology will be the world’s foremost conference for all eminent professionals dealing with plant pathology and plant research science to come together and enrich this event with their research findings and experiences. Plant Pathology Conference offers over 15 scientific sessions from different research areas in the field of plant pathology and advanced plant research science in the form of keynote presentations, plenary sessions, oral sessions, panel discussion, posters presentations, workshops, symposia and young researchers’ forum.

Plant Pathology Conference is going to be held in the New York City, USA during November 25-26, 2020. Plant Pathology 2020 will address the succeeding research and development in the field of plant-pathogen genetics, biological control by microorganisms, plant diseases: identification & control, crop research & seed science technology, computer-aided drug discovery in plant pathology, epidemiology of plant diseases, microbial interactions and plant health and this will provide a major opportunity for collaboration and interaction among all plant pathologists, research scholars and industry personnel.

Plant Pathology Conference will become the leading platform in bringing together all experts and beginners for a friendly and effective research-oriented discussion. The goal of Longdom conferences is to bring together scientists at every level from diverse disciplines to understand and discuss throughout the programmed sessions and comfortable gatherings. All these opportunities will support the professional growth of younger scientists that will promote future collaborations and enhance participation and contribution to their exciting research work.

Plant Pathology 2020 is scheduled in New York City (NYC), which is the most populous city in the USA. The total population of 8,398,748 distributed over about 302.6 square miles (784 km<sup>2</sup>), New York is also the most densely populated major city in the United States. It is located at the southern tip of the USA. The city is the largest metropolitan area in the world by urban landmass, with almost 20 million people in its metropolitan statistical area and approximately 23 million in its combined statistical area. New York City has been described as the cultural, financial, and media capital of the world, significantly influencing commerce, entertainment, research, technology, education, politics, tourism, art, fashion, and sports home for the USA and is an important centre for international diplomacy.

Note:- This Work Is Partly Presented at Webinar on Plant pathology and Soil Health on March 26, 2021| London, UK
