

Medical Summit and Expo on Healthcare and Medicine

Alireza Heidari

President, AISI, USA, E-mail: alirezah2701@gmail.com

Medical Summit and Expo on Healthcare and Medicine, condensed as Health 2020, is a two-day gathering of experienced medical practitioners, professors and researchers from 23 medical disciplines from around the globe on December 14-16, 2020 at London, UK.

The theme of this meeting is 'A Comprehensive Forum for Amelioration of Healthcare' and the specialties hand-picked for discussion are Healthcare Management, Psychology & Mental Health, Internal Medicine, Neurology, General Surgery, Cardiology, Cancer Study, Obstetrics and Gynaecology, Dermatology, Paediatrics, Ophthalmology, Microbiology, Pharmacology, Immunology, Alternative Medicine, Plastic Surgery and Nursing Care. Health 2020 conference will continue to showcase the most crucial issues in healthcare and their relation to the future of medical and broad healthcare leadership and management.

The conference is set to conduct the most awaited 'Young Researchers Forum' on the same dates of the conference. It is brought to you by the Organizing Committee of the Health 2020. The Young Researchers Forum offers young researchers the platform to bring their research to the global attention and to level up their career in medical research. It is a platform where they can learn from the experts directly, an opportunity to closely interact with eminences and to join their peers in the betterment of the future with elite collaborations. It is open for medical students, PhD candidates, fresh graduates and post graduates.

It is separately organized apart from the normal plenary and keynote lectures to provide a more personalized attention to the budding medical researchers and aspiring young entrepreneurs. It gives the young minds a glimpse of industry standards, interacts with peers and mentors and collaborate with interdisciplinary projects. Post-graduate students, post-doctoral fellows, trainees, interns, junior faculty and medical students are eligible to register for this forum. The candidate must be less than 33 years old and all the presentations of this medical forum will be in the official language of the conference which is English. The topic they choose for presentation must fall within any of the scientific sessions of the conference. These oral presentations need to be of 10 minutes duration in the related scientific track followed by 5 minutes Q&A.

Candidates applying for the Young Researcher Award should submit a proof of their eligibility to participate in the Young Research Forum, and a letter of recommendation from a research adviser or a faculty member or the department HOD to health@alliedgather.com followed by which they can go online and register for the same.

The young researchers are encouraged to step up and make use of this opportunity and get global attention for their work. The YRF candidates can compete for the Young Scientist's Award. The award will be a prestigious accomplishment to add to your CV. It will be handed to the winners over by the International Organizing Committee and will be able to click photos with the eminences. The prize winning papers will be exclusively considered for publication in the Allied Academies Publishing Group healthcare journals once the paper is subjected to standard review procedures. We especially encourage the students to step forth and bring their research/ideas to the global attention. 10 Keynotes, 23 sessions, 35 special speakers and many more. Join us at London this December!

For further queries, please feel free to contact the program manager of the conference.
