The Indian Medical Education Sector has steadily grown in terms of number, capability or intake and specializations over the years. The total number of medical colleges with MBBS degrees is 355 with 40,525 seats available according to the latest figures from the Medical Council of India. This is in addition to several colleges providing Diploma or other specialized training.

Because of multiple factors, the nursing education market, which is complementary to graduate training, has been the most attractive field. To assess the nursing education market, Civitas Advisory Solutions conducted a report. The Market Survey was carried out to identify the main pilot-based gaps in nursing education in Kochi, Kerala, to be expanded to Kerala and other parts of the country. In India, there are approximately 371 nursing schools producing nurses who provide their services to hospitals, nursing institutions in India, and different parts of the world. Kerala has a unique place to initiate the migration of nurses to other countries, especially the United States and the United Kingdom, which has spread to Canada and Australia prominently.

Every year, 15 Nursing Colleges produce about 390 nurses at the ANM level and 120 BSc Nursing Colleges. Nurses who successfully leave these institutions are in high demand in different countries, but lack professional expertise in the treatment of cases or patients on their own.
