Editor Note

We are happy to present the Volume 10 issue 73 of the Asian Journal of Biomedical and Pharmaceutical Sciences wherein we have unconfined excellence and prototypical works inside all the applicable chastisements in biomedical and pharmaceutical sciences. The articles in this Issue deliberate numerous characteristics of the Present tendencies in Asian Journal of Biomedical and Pharmaceutical Sciences. Asian Journal of Biomedical and Pharmaceutical Sciences is helmed with specialists everywhere the world as Editors. Asian Journal of Biomedical and Pharmaceutical Sciences has established and stimulated investigation into the relatives among biology and medical sciences. Our journal privileges high standing in considerate and fast-tracking numerous articles in biomedical sciences and several other related topics as well. Making an allowance for the position of human healthiness in the present consequence and numerous alternative medicinal and scientific issues related with it, the major courtesy in the direction of biomedical and pharmaceutical sciences all over the world is of excessive consequence. Thus, by declaring the obligation of a mutual and supplemented evidence division stage, Asian journal of biomedical and pharmaceutical sciences has been allocation persons with Excellence data in all field of Biology and Medical Sciences Widely read by theoretical and applied scholars, physicians, clinicians, faculty and experts, the journal prints articles of a applied or theoretical nature that effort to development our sympathetic of the Biomedical and Pharmaceutical Sciences. The main apprehension of the Journal has always been on two things i.e., quality and nature of submission. These aspects are utmost important and are the deciding factors for the quality of

the Journal. As an Editor, I always encourage publication which follows a certain set of philosophies. The paper submitted have to be original, the methodical rigour, the innovation in articles and also the range of simplicity in lettering are the significant standards in the peerreview process. With this note I inspire and request all the New researchers out here, experts as well as PhD scholars to get out their original detail conclusions in numerous disciplines such as, Virology, Medicine, Biotechnology, Biochemistry, Genomics, Immunology, Haematology, Forensic fields, Toxicology, Pharmacy, Chemistry, Cancer studies, Clinical Trials, Oncology, General health, etc. I take this chance to spread my soul full thankfulness to the Editorial Board as well the Commentators whose marvelous involvement and sustenance has complete the Journal to reach its elevations. I am extremely obligated to the Reviewers of journal for their spectacular sustenance. Their determined exertion cannot be undervalued. Rare facts about the Journal that you might be involved in: The Journal welcomes the novel Editorial Board. The reversal time from submission to acceptance has been decreased to 21 days to 14 days. One of my goals is to reduce the time expended from the day the article is submitted and printed so the Journal has functioned to rapidity up the period it takes by the well-known commentators to report back and likewise the interval occupied by the writers to address the Review observations. I am also eager to announce that the quantity of reviewers allotted to review a precise article has been amplified to three and I optimism to endure this number in 2020 and beyond. In the year 2020 the Journal desired to emphasis on Public Networking sites such as Twitter, LinkedIn, Whatsapp for comfort in statement and also to platform the manuscript printed in Journal on these stages in command to achievement and grasp extreme quantity of certifications.
