

Thought for the present moment in practicing anesthesia.

Lipika Baliarsing*

Department of Anaesthesiology, BYL Nair charitable Hospital and Topiwala Nair Medical College, India

Introduction

It is with great sense of achievement and delight we would bring forth the fact, it's encouraging and challenging to have completed the sixth successful year in the publication of Anaesthesiology and clinical research journal. It is indexed by Google scholar, doi cross reference, CABI, Index Copernicus, Dimensions, Garuda. The website has visitors from Indonesia, USA, Japan; India mostly. The journal Anesthesiology and Clinical Science Research is participating in the Fast Editorial Execution and Review Process (FEE-Review Process) with an additional prepayment of \$99 apart from the regular article processing fee. Fast Editorial Execution and Review Process is a special service for the article that enables it to get a faster response in the pre-review stage from the handling editor as well as a review from the reviewer. An author can get a faster response of in pre-review maximum in 3 days since submission, and a review process by the reviewer maximum in 5 days, followed by revision/publication in 2 days. If the article gets notified for revision by the handling editor, then it will take another 5 days for external review by the previous reviewer or alternative reviewer. On behalf of the Allied Academies Publishing AAACSR.

Out of all the papers published Most of the papers were from United States of America, India. Average publication lag time of an article was further reduced to 45 days.

The Timeline of processing from Submission to Publication is 45 days. Manuscript will be published within 7 days of acceptance. Between Acceptance and publication, the papers under per review process up to 21 days. Journal of Anesthesiology and Clinical Research/JACR that focuses on anesthesiology; pain management; intensive care; emergency medicine; disaster management; pharmacology; physiology; clinical practice research; and palliative medicine.

We have contributed to knowledge of Anesthesiologists through publishing best practices followed by the publishing authors. Almost more than 250 million surgical procedures requiring anesthesia are happening every day all over the world and complications are observed in terms of damage to organs and death in almost a million patients. These outcomes can happen within therapeutic administration of anesthetics and can be due to over dosage too. It's important to learn to practice safe anesthesia.

We would give more important to all innovative work in terms of technique of regional and general anesthesia and pain practice. Super speciality surgery including cardiac, Neuro, Pediatrics anaesthesia topics will be reviewed with great interest and within time.

I along with the team express gratitude to all authors for considering this journal for submitting their work. This journal has wide spread cover in social media and readers base is high. We promise for more accessibility and visibility through most search engines.
