Description

We are happy to this the quantity 11 issue 77 of the Asian Journal of Biomedical and Pharmaceutical Sciences (AJBPS) wherein we've free excellence and prototypical works inside all the applicable chastisements in biomedical and pharmaceutical sciences. The articles throughout this Issue deliberate many characteristics of these tendencies in Asian Journal of Biomedical and Pharmaceutical Sciences. AJBPS is helmed with specialists everywhere the planet as Editors. Asian Journal of Biomedical and Pharmaceutical Sciences has established and stimulated investigation into the relatives among biology and medical sciences. Our journal privileges great standing in thoughtful and fast-tracking numerous articles in biomedical sciences and a number of other related topics. Making an allowance for the position of human healthiness within the present consequence and various alternative medicinal and scientific issues related with it, the main courtesy within the direction of biomedical and pharmaceutical sciences everywhere the planet is of excessive consequence. Thus, by declaring the requirement of a mutual and supplemented evidence division stage, Asian journal of biomedical and pharmaceutical sciences has been allocation persons with Excellence data altogether field of Biology and Medical Sciences Widely read by theoretical and applied scholars, physicians, clinicians, faculty and experts, the journal prints articles of a applied or theoretical nature that effort to development our sympathetic of the Biomedical and Pharmaceutical Sciences. The most apprehension of the Journal has always been on two things i.e., quality and nature of submission. These aspects are utmost important and are the deciding factors for the standard of the Journal. As an Editor, I always encourage publication which follows a particular set of philosophies. The paper submitted need to be original, the methodical rigor, the innovation in articles and also the range of simplicity in lettering are the many standards within the peer-review process. With this note I inspire and request all the New researchers out here, experts also as PhD scholars to urge out their original detail conclusions in numerous disciplines

like, Virology, Medicine, Biotechnology, Biochemistry, Genomics, Immunology, Hematology, Forensic fields, Toxicology, Pharmacy, Chemistry, Cancer studies, Clinical Trials, Oncology, General health, and many more. I take this opportunity to spread my soul full thankfulness to the Editorial Board also the Commentators whose marvelous involvement and sustenance has complete the Journal to succeed in its elevations. I am extremely obligated to the Reviewers of journal for his or her spectacular sustenance. Their determined exertion can't be undervalued. Rare facts about the Journal that you simply could be involved in: The Journal welcomes the novel Editorial Board. The reversal time from submission to acceptance has been decreased to 21 days to 14 days. one among my goals is to scale back the time expended from the day the article is submitted and printed therefore the Journal has functioned to rapidity up

the amount it takes by the well-known commentators to report back and likewise the interval occupied by the writers to deal with the Review observations. I am also wanting to announce that the number of reviewers allotted to review a particular article has been amplified to 3 and that i optimism to endure this number in 2021 and beyond. Within the year 2021 the Journal desired to emphasis on Public Networking sites like Twitter, LinkedIn, Whatsapp for comfort in statement and also to platform the manuscript printed in Journal on these stages in command to achievement and grasp extreme quantity of certifications.
