

International Conference on  
Organic and Inorganic Chemistry

8<sup>th</sup> World Congress on  
Green Chemistry and Technology  
February 18-19, 2019 | Paris, France

## Petrochemicals - Trends and challenges

**Dorothee Arns**

Petrochemicals Europe, Belgium

The intervention will focus on the following elements:  
How the European Petrochemicals industry contributes in a sustainable way to the economic and societal well-being of Europe. How chemical markets evolve. Why a lower oil price does not change the situation for the European Petrochemicals industry. The competitiveness challenge for the European Petrochemicals industry: Feedstock

price, electricity price, regulatory challenge, investment leakage. Debrief on the European Commission's cumulative costs assessment of its legislation on the European Petrochemicals industry. The performance of the European Petrochemicals industry in reducing GHG emissions.
