THAILAND'S LEGAL AND REGULATORY FRAMEWORK FOR FOREIGN INVESTMENTS IN AGRICULTURE

A part from bio-technology, an essential aspect of plant science is its practical realization under the local legislator and regulatory framework. These aspects are discussed and explained. The topics could be as follows: Foreigner legislation on business activities, work and land ownership in Thailand; licensing and approval requirements, work-flow and time-line; new developments on investment promotion by the Thailand Board of Investment on agriculture and farming-related science; and milestones of the legal project management for foreign investors in Thailand.

Note:
