ARTHROSCOPIC DISTAL CLAVICLE EXCISION IN AC ARTHRITIS

Hazem Elhaddad and **Ahmed Fouad Seif Eldin**

Cairo University, Egypt

AC joint Arthritis cause is occurring with many variations it could be a part of general osteoarthritis or post traumatic post traumatic becomes very popular in professional athletic even after reduction and fixation, The main symptoms is pain and affection of rotator cuff muscles. Arthroscopic distal clavicle excision is one of the best solutions as it is less invasive and disappearing the symptoms dramatically
