Global Dermatology Institute, USA

Cosmetic procedures for skin aging

More patients than ever are seeking skin rejuvenation and aesthetic services in order to look younger. This National Conference will aim to show which cosmetic procedures are utilized most often in the Aesthetic Physician's office. Procedures such as Botox, Dermal fillers and chemical peels will be demonstrated. Appropriate injection techniques with particular detail to understanding the anatomy and physiology of the skin will be emphasized to provide the optimum cosmetic results. Upon conclusion of this National Conference, the healthcare provider should be prepared to provide appropriate recommendations on which treatment would be most suitable for a particular patient.

Speaker Biography
