NEW PERIODONTAL CLASSIFICATION CREATES NEW CONCEPTS FOR PERIODONTAL DISEASES

Ossama Alkhatib

Alfarabi Dental College, Saudi Arabia

The concept of periodontal diseases has been becoming more clearness and understanding recently, and all efforts spent to put a new periodontal classification which will give us a different view about some periodontal diseases they faced before. The pathophysiology and progression of periodontal disease has been more explained, for that the periodontal treatment appears to be more complicated because of many risk factors are responsible locally and systemically. The periodontal treatment is given to the patient should be supported by extended recalls of periodontal maintenance care.
