March 18-19, 2019 | London, UK

Pulmonary adenocarcinoma lung cancer both metabolic and dietary acidic conditions

Robert Young

pH Miracle Medical Association, USA

Cystic fibrosis (CF) and Pulmonary Adenocarcinoma (PAC) have similar symptomologies and are chronic, progressive, and frequently fatal acidic conditions of the respiratory system (lungs), lymphatic system (lymph nodes), intestines, pancreas, urinary tract system, reproductive organs and the skin as the alkaloid glands (the salivary glands, stomach, and small and large intestines) produce and secrete alkaline compounds, such as sodium bicarbonate to buffer and preserve the alkaline design of the body and the specific organs and glands affected. These metabolic and dietary acidic conditions resulting in the build-up of mucous can affect any organ or organ system but primarily affects the respiratory, lymphatic system, digestive, and reproductive tracts in children and young adults with CF and the lungs and surrounding lymph nodes in PAC. I have suggested from my own clinical research that both of these conditions are the result of latent tissue acidosis (LTA) in the interstitial fluids of the Interstitium or the

fluids that surround every cell, created from metabolism, diet, thoughts and environment and may be successfully treated and reversed with an alkaline lifestyle and diet (ALD).

Speaker Biography

Robert Young has been widely recognized as one of the top research scientists in the world in the nutritional sciences. He has a PhD in Nutrition, an MSc and a DSc in biology and chemistry. He also has a ND in the naturopathic sciences. Throughout his career, his research has been focused at the cellular level having a specialty in cellular nutrition, he has devoted his life to researching the true causes of "disease," subsequently developing The New Biology to help people balance their life. In 1994, he discovered the reality of biological transformation of red blood cells into bacteria and bacteria to red blood cells. He has documented several such transformations. His research findings have been published in several noted journals, including The Journal of Alternative and Complementary Medicine. (Sympathetic Resonance Technology, Scientific Foundations and Summary of Biologic and Clinical Studies, Dec. 2002, Vol. 8, No. 6: 835-842). Metabolic and Dietary Acids are the Fuel that Lights the Fuse that Ignites Inflammation that Leads to Cancer!. He is the author of numerous articles (Herbal Nutrition 1988) and author and co-author of many books. He has currently sold over 5 million pH Miracle books in 191 countries and his books are translated in 29 different languages.
