And find a path to carve out near to perfect platform where people like get together and discuss the possibilities in the field of neurology and its aspects.

Experiencing a depression is more than simply feeling fed up and sad for few days. Everyone has a moment of feeling low throughout the day. But depression is constant for weeks or months and the real illness with the symptoms. To know such exciting topic about depression this event is going to organize in such a way to provide an exclusive platform for educators, new experts, learners to present and discuss more new innovations possibilities concerns in the depression field.

### **Scope and Importance of Depression Congress**

Depression is an illness that affects a person, mood, body language, and no ability to function in everyday life. Although it is a very common disorder many people will not discuss it. No one knows exactly what causes the depression, and symptoms are not the same in everyone. Symptoms appear sometimes for an apparent reason or they may occur after a horrifying event. To be diagnosed with the depression, the person should decrease interest or increased sleeping or loss of energy, feeling worthless or guilty or difficulty thinking or concentrating. Because the symptoms of depression can change from day to day .it is important to talk with the people who are closest about

what you're experiencing. These conversations will be difficult. But most experts agree to help.

Depression covers a huge range of human, emotional. As a normal mood depression is everywhere in human existence. Depression Occurs in many reactions like Stress, medical and psychiatric conditions. Although the major focus of depression and affective disorders as a clinical condition.

The normality of depression causes problems for clinical practice. It is necessary to understand the nature and function of depressions as it is a normal emotion. Emotion is usually indicated by the total range of behavioral changes that fluctuate in normal life. Since the late 19<sup>th</sup> Century, mental disorders are classified by the psychological faculty.

Considering most impaired: Mental radiation, thinking, and character, personality disorder, and mood affect their environment.

The Americans make illegal to segregate a person with a disability. As long as person perform the essential job.
