

Conference Announcement: 3rd International Conference on Pathology and Surgical Pathology | Amsterdam, Netherlands | July 13-14, 2020

Majid M Bassuni

Fakeeh University Hopsital , United Arab Emirates, E-mail: bassuini@aol.com

With the affluent completion of our “**2nd International Conference on Pathology and Surgical Pathology**” which was held in Paris, France on July 5-6, 2019 with the theme of *Revamping Innovations in Pathology and Surgical Pathology*. We are glad to bring it back with a much-revised version of the “**3rd International Conference on Pathology and Surgical Pathology**” scheduled for July 13-14, 2020 in Amsterdam, Netherlands.

The past conference pursued with conspicuous Keynote presentations, followed by Oral and poster presentations, Workshops and Exhibitions. With over 25+ participants from distinctive countries, the conference was a notable success.

We are thankful to the speakers, delegates, agents of companies and other prominent identities who attended the event and rendered their dynamic support. With demands from the past participants, we have taken action to present the arrangement of the ‘**3rd International Conference on Pathology and Surgical Pathology**’.

Announcing Surgical Pathology 2020!

After much expectation from our previous participants, we are organizing the “**3rd International Conference on Pathology and Surgical Pathology**” on July 13-14, 2020 to take place in Amsterdam, Netherlands.

We, therefore, put forward the [Surgical Pathology conference 2020](#) as an intrigue program that meets the requirements and

needs within the fields of pathology and surgical pathology.

It is with extraordinary delight that we welcome [Pathologists](#), researchers, scholars, Professors, Businesses and fabricating units related to the field of Pathology, Lab professionals, delegates from over the world to be a part of the [Surgical Pathology congress 2020](#).

Surgical pathology is a study of tissues removed from living patients during surgery to help diagnose a disease and develop a treatment plan. Often, a surgical pathologist provides consulting services in a wide variety of organ systems and medical sub-specialties. Surgical pathology includes physical examination of unaided eye tissue. It also includes the examination of processed tissue under a microscope. New methods of tissue and cell sample testing include molecular diagnostics (DNA / RNA analysis). This involves the analysis of DNA and proteins in the blood and tissues.

With many more additions to the previous sessions our conference highlight for Surgical Pathology Event includes: Histopathology, Organ-Specific Pathology, Soft Tissue Pathology, Clinical Pathology, Surgical cytopathology, Hematopathology, Psychopathology, Immunopathology, Oral and Maxillofacial Pathology, Gastrointestinal Pathology, Ophthalmic Pathology, Pulmonary Pathology, Cardiovascular Pathology, Oncopathology, Endocrine Surgical Pathology, Genitourinary Pathology, Renal Pathology, Orthopaedic Surgical Pathology, Fetal and Congenital Pathology, Genetic Pathology, Veterinary Pathology and Neuropathology

The [Surgical Pathology meeting](#) deliberations focus on Surgery, pathology and it’s sub-fields and is designed to provide a platform for discussion and networking along with sharing of new ideas and advancements in the field of Surgical Pathology.

This occasion is organized as a two-day program with imperative Keynote forums, plenary presentations, poster presentations, exhibitions, workshops and more. By taking part in the event, sharing knowledge and collaborating, the research community will be benefited.

We welcome you all to associate, contribute and collaborate with pathologists and Specialists from around the globe in the [Amsterdam Surgical Pathology summit](#), July 13-14, 2020.
