

International Conference on Rehabilitation and Physical Medicine

Adrian Udrea

Medical Director, Co-Owner la Medisprof Cancer Center, Romania.

The [Rehabilitation conferences](#) organizing committee, is proud to announce the opening of Young Research Forum for the most awaited International Conference on Rehabilitation and Physical Medicine scheduled to be held on July 6-7, 2020 in Amsterdam, Netherlands with the theme of “Unveiling Recent Research in Rehabilitation” which focuses on the current advancements that can precisely influence the potential developments in the area of physical medicine and to provide the young researchers who are going to serve the future world with a discussion council with the most accomplished professionals in the date.

[Rehabilitation](#) 2020 purposes to amass the young minds which incorporate students, graduates, Ph.D. fellows etc. from around the globe in order to present them with a platform to communicate their concepts and innovations including on-going researches and research outcomes with well-informed mentors and scientists who can support or recommend their valuable opinions for the same.

The conference aims to inspire and instruct the young mind set by guiding them with the help of the most skilled and enlightening scientists and doctors in the field of rehabilitation and [physical medicine](#). The congress will offer great interacting possibilities which will give the young researches with a chance to get their on-going or finished works examined by associates and seniors likewise.

The young academicians in the field of rehabilitation and physical medicine can gain professional development by the provided networking opportunities with the skilled professionals in the field along with trading ideas to open new ways of novelty with board discussions with their colleagues and peers where they can have the advantage of learning from each other in a approachable atmosphere and shape a communal footing of young scientists in the arena.

The conference paper of rehabilitation and physical medicine must consist of new ideas that have not been disseminated earlier in order to have a qualitative assessment for choosing the best young researcher among the congregation of scientists.

The standards to be enrolled under Young Research Forum includes young researchers, graduates and post graduate students, post-doctoral fellows, junior faculties and trainees who are under the age of 33 years.

The abstracts submitted must be legitimate and honest to the essence and must be made in English under any of the conference highlights which will be reviewed by experts and experienced professionals relevant to the field in order to be published. The researchers can gain the benefit of getting appraisals and explanations to unsolved problems from resource persons in the field of [rehabilitation](#) and physical medicine and distribution of information among the young scientists.

The Best Young Research Forum Award will be awarded to the scientists whose involvement and innovation will have the projection to bring ground-breaking transformations in the field of Rehabilitation and [Physical Medicine](#) and the proposed paper will be published in the Allied academies Publishing Group journals.

We embrace the young minds from around the world in the field of Rehabilitation and Physical Medicine who are already acting intensely to create a better future for the health of the world population. We await your honourable presence at the rewarding event.
