### Introduction

Liquor addiction and medications (A criminal angle in criminal science) Introduction Alcoholism and medications are the two significant perspective which hurt the general public as well as damage the young people of the teen age for the most part the medications is utilized by the high school individuals since they needed to take a stab at a new thing and when they attempt .it became constant medications is the criminal viewpoints since drugs use is illicit different kind of medications resemble inward breath infusion, drugs is the not kidding issue it impact the individual bodies as well as mischief the individual there are sure changes in the conduct additionally in the event that they don't have cash they entertained themselves with various method for getting the cash person who mishandles liquor are likewise bound to different substances we can relate the medications with wrongdoing since utilizing of medications is a criminal angles in India. yet, we can observe just the young are not the piece of it who are dependent on it like elderly person youth anybody ought to turn into the piece of this.

Through the Indian report around 50 % of death happen through the medications and the liquor medications and liquor added to physical and sexual hostility, for example, attack and assault utilizing of liquor and medications is lead to the downturn and the uneasiness genuine maltreatment of medications ought to be additionally found in the individual assuming an individual is so dependent on drugs individual they will hurt any individual like relative or companions or anybody .it is the significant issue that somebody should confront it . It should hurt the general public and the approaching age too.

Liquor is a drugs yet medications and liquor is contain not kidding substance and individual partake in its delight and become dependent on it.

Drugs is what control the human psyche and conduct either the individual become severally discouraged or may either continue to injury of medications since medications ought to have the straightforwardly association with the mind of the individual and individuals become routine to it they could either continue to the extended rest or either lose the control of the body. Individuals ought to partake in the delight of the medications. Medication ought to have the exceptionally destructive impact on the body.

Liquor abuse rates are higher in the India as indicated by the Indian report the adolescent are drinking more liquor and medications polishing off are illicit however both taken by the higher rate in India as per the overview there are higher pace of individuals with so many medical problems or some individual gone for the directing or for the restoration place for not to utilizing the medications higher rate ought to be found in the young gathering checking as pace of wellbeing related issue and happening from any sort of injury like confronting gloom

extreme wounds like hurting themselves its happen for the most part when the individual go for guiding they harms themselves.

### Discussion

There are different kind of medications:

- Heroin-This medication is contained narcotic opiates the individual who take heroin first they partake in the joy of it they gives you the positive sentiment yet step by step you might experience the ill effects of the major issue like sickness.
- Cocaine- this kind of medications is exceptionally quick once you take this you can think quick, run quick, walk, and you feel cheerful however when you quit taking it your joy is out of nowhere transform into the annoyance.
- Marijuana- taking this you might chuckle or feel senseless and lost attitude or forget all that which was going to you.

### Conclusion

#### *Drugs Abuses*

Drugs misuse obliterate the family as well as own existence of individuals it assume a significant part in the social issues drugs made the individual forceful they either turned into the irascible they could likewise hurt themselves additionally in the event that they don't get drugs. Some individual become so dependent on it they could take the cash just to get drugs they become so focused on they become destitute they either do violations likewise. Assuming the individual ingest medications and drive the vehicle that implies he is hurting her life likewise and the other individual life additionally on the grounds that in the wake of consuming medications individual lost the brain and listening ability to hear and to figure it might likewise hurt the family it ought to have the immediate impact on the youngster's mind it might likewise hurt the unborn children. There are many sorts of treatment of the medications like advising and so forth.

Liquor Abuses:

Liquor is additionally not kidding issue among everybody except once who become seriously dependent on it they face parcel of issue in their own life on the grounds that drinking of something a lot of is likewise hurt body and furthermore hurt family, relationship, etc. for instance assuming an individual polish off liquor in a day he takes liquor 7 times each day and beats his better half generally individuals coming from the helpless foundation should verge a ton and beat his significant other or any of the relative since cash and liquor become more significant than their relative this are the sort of the maltreatments which individuals ought to experience the ill effects of this is on the grounds that their relative ought to need to experience the ill effects of the risks.

The individual become seriously discouraged

- Experiences uneasiness issue
- Acting like the unusual individuals
- Individuals may lose the brain and have the power outage

Many individuals drink liquor because of companion pressure, anxiety and forlornness liquor addiction hurts the individual from inside in the event that the individual become so dependent on medications, the person ought to be ship off the recovery place for the great future and for beating the habit connected with medications and liquor in the restoration community no individual feel alone they give the best treatment to conquer the medications and liquor fixation issue and they give the best and great future for the individual by defeat this both thing the

individual who are deprived to beat this issue they ought to go to the recovery community .numerous individual needed to emerge from this thing however the enslavement are high that they couldn't emerge from this Drugs control the brain of the individual and certain conduct changes ought to be happened.
