

Oncology Conference Series Announces the Date and Venue for Unique Conference Deliberated on Preventive Oncology

Ibrahim Mashaal

Senior Consultant, Department of Gynecology and Obstetrics, El-Mahalla General Hospital, Egypt, E-mail: gynecology@gynecologyconferences.com

[Preventive Oncology 2020](#) will call together Oncologist, Physicians, Clinical assistants, Researchist and Industrialist to focus upon the prevailing key issues in the field of oncology.

The Oncology Conference series has now announced the date and venue of the upcoming [World Congress on Preventive Oncology](#). The Preventive Oncology, as it is shortly named, will commence on the morning of September 30, 2020 and extend up to the evening of August 01, 2020. The two-day conference will be held in Edinburgh, Scotland. With the announcement of date and venue, the organizers are keen to announce the registration and abstract slot opening shortly. They have also hinted upon scholarships for the early bird registrants.

The Conference on Preventive Oncology will be seating more a handful of distinguished panellist and plenary talks and expects to accommodate more than 50+ speakers, including oncologist, doctors, research scholars, students, clinical experts, oncology nurses, cancer survivors and Non-governmental organization, who immense themselves for the welfare of [tumour](#) patients. The International Organizing Committee will be handpicked, as they will be deciding upon the theme and agenda of the conference.

[Preventive Oncology](#) is defined as active measures to decrease the risk of cancer. Most of cancer incidents are due to environmental risk factors, of which most are lifestyle choices that are controllable if taken seriously. More than 30% of cancer deaths can be prevented by avoiding risk factors like tobacco, obesity, alcohol, STDs, limited plastic usage, air pollution etc., While most risk factors are controllable, but not all, like the natural risk factors including radiation, genetic factors accounting to cancer/ oncogenes. Hence, not cancer is not completely preventable in all cases.

[Preventive Oncology 2020](#) is highly pleased in organizing this fruitful opportunity and hopes that it will be received well from all the ends, i.e., speakers, sponsors, exhibitors, delegates and student forums. With the ever-growing incidence of cancer, causing millions of deaths each year, preventive oncology conference hopes this congruence of experts from all over the globe is the need of the hour.

The YRF provides the student community, young researchers, junior research fellows, PhD aspirants a wonderful opportunity to present and participate at the conference at much cheaper price. Students can also participate as a delegate and understand the important topics of today's research world.

[Preventive Oncology 2020](#) also takes immense pleasure in announcing the award opportunities. As part of the young researcher's encouragement program, [Preventive Oncology 2020](#) takes great pride in introducing Young Researcher Award,

which will be awarded to one participant, who is eligible to participate in the forum, after careful evaluation of the research paper, innovative ideas and presentation. Also, Best Poster Award shall be awarded as a separate category. We hope [Preventive Oncology](#) would provide the right platform to ambitious researchers.
